

AVES[®] REGELTEX

PNEUMATIC TESTER

Article No.: 67184RG398

The pneumatic tester is a pump system optimizing inflation and thus visual inspection, especially at the cuff level.

SPECIFICATIONS

Before using insulating gloves for live working, the **EN 60903:2003** and **IEC 60903:2002** standards recommend a visual inspection by inflating the gloves with air to detect any possible leakages.

In view of the thickness of the gloves class 1, 2, 3 and 4, inflation by the tester is not appropriate. For these gloves, inspection of the inside and outside surfaces must be done. An electric test every six months is strongly recommended.

APPLICATIONS

- Use in live working electrical works

STANDARDS

EN 60903:2003
IEC 60903:2002

Electric Arc Resistant

Polybag Packing
