

PROOF - FT PROTECTIVE LINE EVOLUTION NMX-3A

Article No.:

Jacket - 47175FT325 / Trouser - 53175FT325

Proof® fire fighting suits engineered to provide maximum protection and durability with less stress and less fatigue. Designed to give way the human body moves, enabling fire fighter push to the limits of performance without restriction.

NAVY BLUE

TAN

- Excellent heat and flame resistance
- Positive ratio of quality and price
- Certified according to NFPA 1971-2013
- Standard on Protective Ensembles for structural Fire Fighting

DuPont™ Nomex® & Kevlar® brand fibers provide superior strength, durability and thermal protection that stand up to the heat. Nomex® provides proven performance & permanent flame resistance and, when blended with other high performance fibers, Kevlar® enhances the durability and strength of lightweight turnout gear outer shells.

CONSTRUCTION

Outer Layer: NOMEX® IIIA

Moisture Barrier: STEDAIR® 3000 (Nomex E89 spunlace substrate laminated to breathable ePTFE membrane)

Thermal Barrier Layer: 2 Layer Aramid Felt Quilted to Aramid Woven

FEATURES

- Flashlight hook and adjustable Velcro strap
- Throat tab - added coverage across the bottom for precision SCBA mask interface, collar adjustment and protection
- Radio pocket with extra STEDPRENE reinforced layer
- Drag Rescue Device System (DRD) for rescuing downed fire fighters, hidden between inner and outer layer of the jacket
- H-Back Suspenders
- Two cargo pockets with STEDPRENE at the lower half of pockets
- Inside zip and Velcro storm flap closure
- Knee Pad (Stedshield+Kevlar felt)
- FR Reflective tapes 3 inches width
- Cuff edges has extra layer of Stedshield as reinforcement

INTERNATIONAL STANDARDS

SIZES: Small to 4XL

JACKET STANDARD FEATURES & BENEFITS

1. Free Hanging Throat Tab

4-layer throat tab hangs freely away from your neck and out of the way when not deployed. When deployed there is no exposed VELCRO®. Tab is scooped out across the top with added coverage across the bottom for a precision SCBA mask interface collar adjustment, and protection.

2. Contoured Collar

Unmatched for comfort and protection, the tailored 2-piece construction is used in all 4 layers of the collar with 4 rows of stitching on the underside shell layer maintaining the ergonomic shape when the collar is flipped up or laying down.

3. Contoured Sleeves

Ergonomically curved sleeves follow the natural shape of your arm to work with you - not against you. Contoured and graded for each jacket size so you always get the right fit.

4. Action Sleeve

Pleats built into the shell & darts in the liner on the front and back of each sleeve provide extra length where you need it for reaching up. This system allows you to raise your arms with complete mobility and with minimal coat rise.

5. Breathable Front Closure System

Storm flap and inside facings are lined with breathable moisture barrier material for improved ventilation of critical body core. Concealed heavy duty brass zipper & VELCRO® storm flap.

6. Sleeve Cuffs

Each sleeve has a thumbloop fitting rib-knitted sleeve cuffs made of NOMEX® material. The sleeve cuff is attached to the sleeves.

7. Sleeve Wells

Extra-deep 5" telescoping sleeve wells keep water out, interface with all glove styles, and add additional thermal protection. The knit wrist is attached to the liner for increased mobility when reaching. And the inner cuff adjusts with elastic and hook and loop for a "just right" fit.

8. Drag Rescue Device (DRD)

Use in rescuing incapacitated firefighters.

9. Reflective Trim

3M Scotchlite® in 2" and 3", both in solid or triple trim; lime/yellow and fluorescent orange with or without silver offers fluorescence for day time visibility and superior reflective properties for night time visibility.

PANT STANDARD FEATURES & BENEFITS

1. Expansion Knees

Expansion gussets in the shell and darts in the liner system add fullness to the knee, providing fatigue-free mobility when climbing ladders, crawling or stepping onto apparatus.

2. Exclusive Diamond Crotch Gusset

Distributes fabric stress over five double-stitched seams in both the shell and liner. Eliminates binding and bulk while increasing comfort and durability.

3. X-Back Suspender

An improved suspender support arrangement for firefighter's trousers

4. Easy Adjust Take-Up Straps

Just one quick pull. No hook and loop, metal buckles or dangling straps. Black NOMEX™ twill and high-temp polymer buckles give you quick and easy adjustment. Provides more even support for the inner liner and the outer shell of turnout pants.

5. Heavy Duty Closure

Full length VELCRO® overflap with metallic snap button closure.

6. Cargo Pockets

Two full bellows style cargo pockets have an extra layer of shell material to reinforce the lower half for longer wear life. Perpendicular VELCRO® fastener secures the flap empty or full.

7. Reflective Trim

3M Scotchlite® in 2" and 3", both in solid or triple trim; lime/yellow and fluorescent orange with or without silver offers fluorescence for day time visibility and superior reflective properties for night time visibility.
